

Impetus for AB 1775

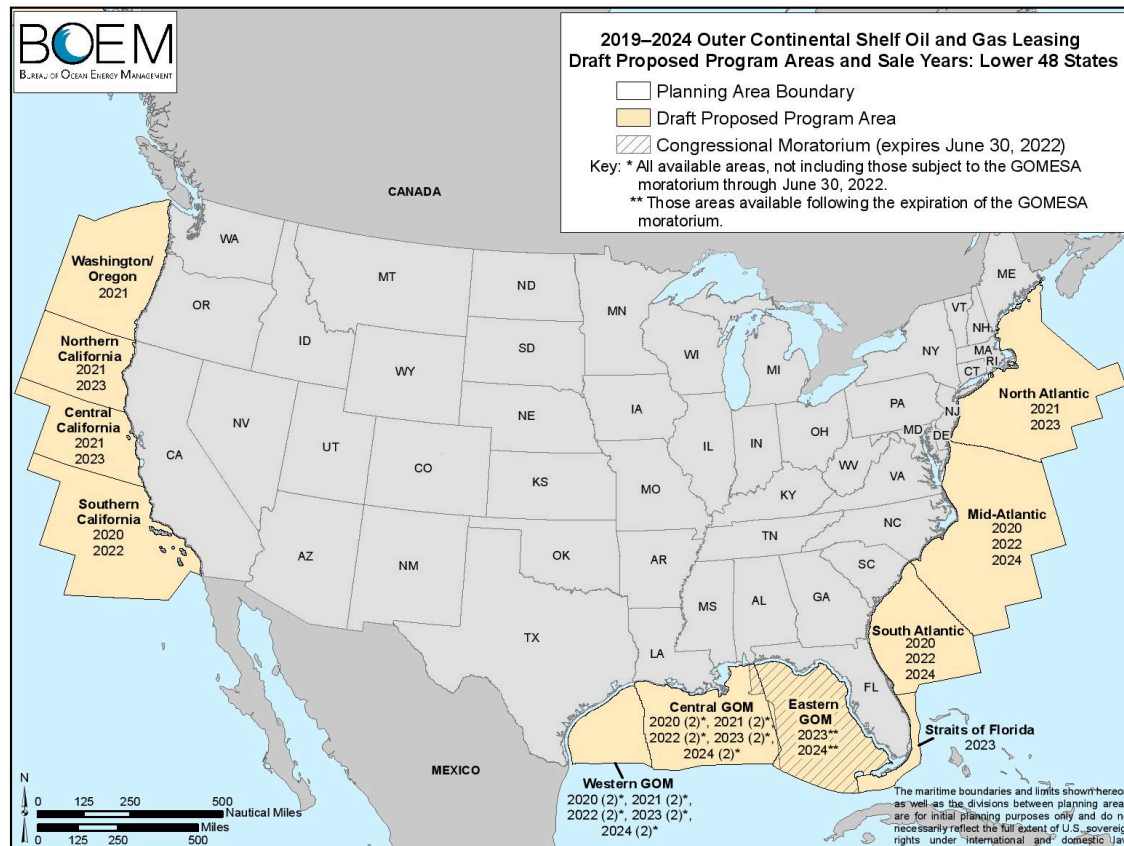

- On April 28th, 2017, President Trump issued Executive Order 13795, allowing for oil drilling in previously protected parts of the Outer Continental Shelf (OCS)
- On January 4th, 2018, the Trump administration announced a five year plan to open over 90% of the OCS for 47 new oil and gas leases, including 6 off of California's coast
- Increased drilling increases the risk of oil spills

Existing Leases, Platforms and Pipelines in State Waters

Proposed Lease Sales Under OCS Five Year Plan

Components of AB 1775

- AB 1775 prohibits California State Lands Commission from providing new permits for additional oil and gas exploration
- AB 1775 prevents pipelines for new offshore oil drilling from extending into state waters

Goals of AB 1775

- AB 1775 will protect California's coast from oil spills
- AB 1775 will protect the coastal economy, which generates \$662 billion in wages and \$1.7 trillion in GDP
- AB 1775 will decrease our dependence on fossil fuels

Context

- California's efforts to protect its coast from oil drilling have historically received bipartisan support
- For decades, the federal government has respected California's policy to keep new drilling operations out of state and federal waters
